

## Watermelon Seed Collecting Game

To be used with  
Week 2 Lessons  
of curriculum

### Instructions

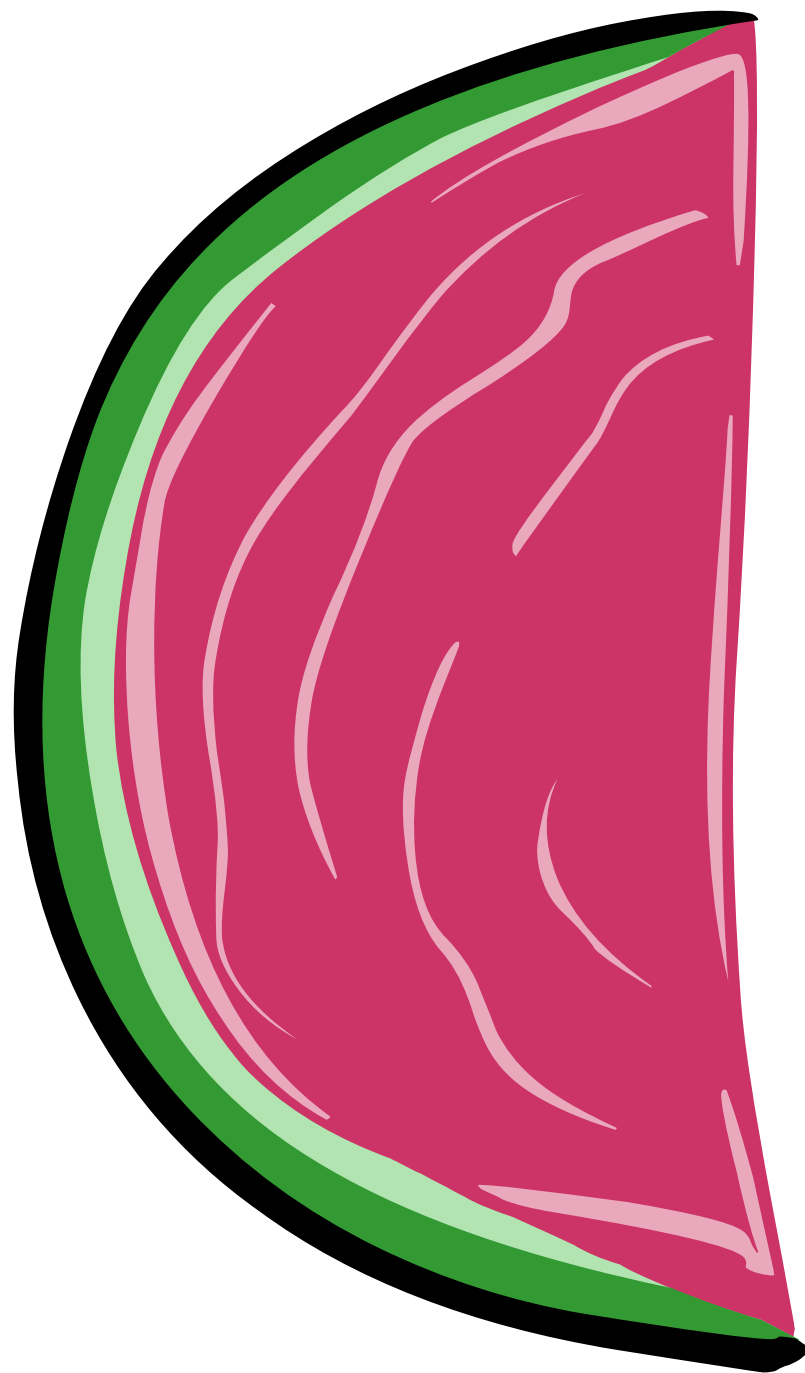

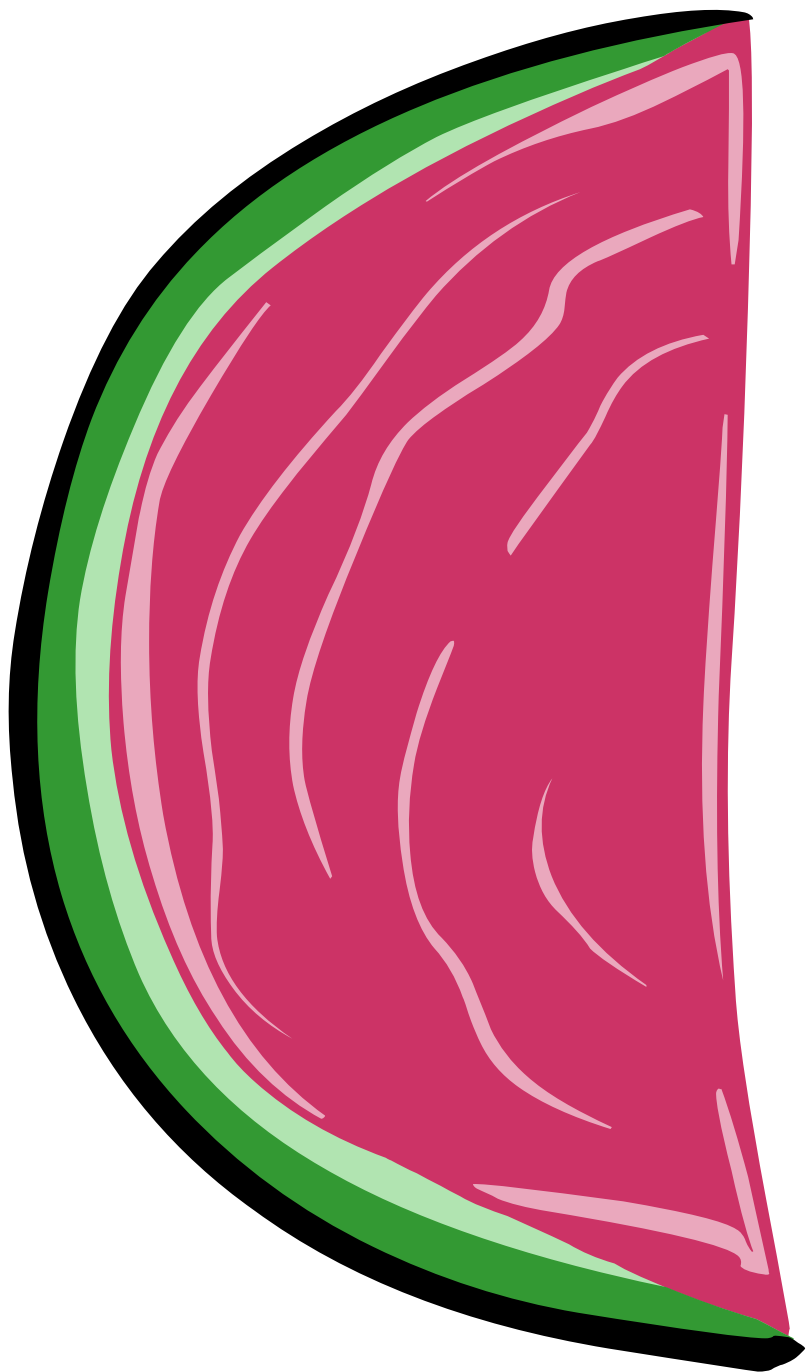

- 1 Print out the watermelons (page 2) on 8 1/2"x11" paper, in color.
- 2 Print out the game (page 3) on 11"x17" paper, in color.
- 3 Cut out the watermelon pieces and laminate separately. Then cut out each laminated watermelon piece.
- 4 Laminate the board game.

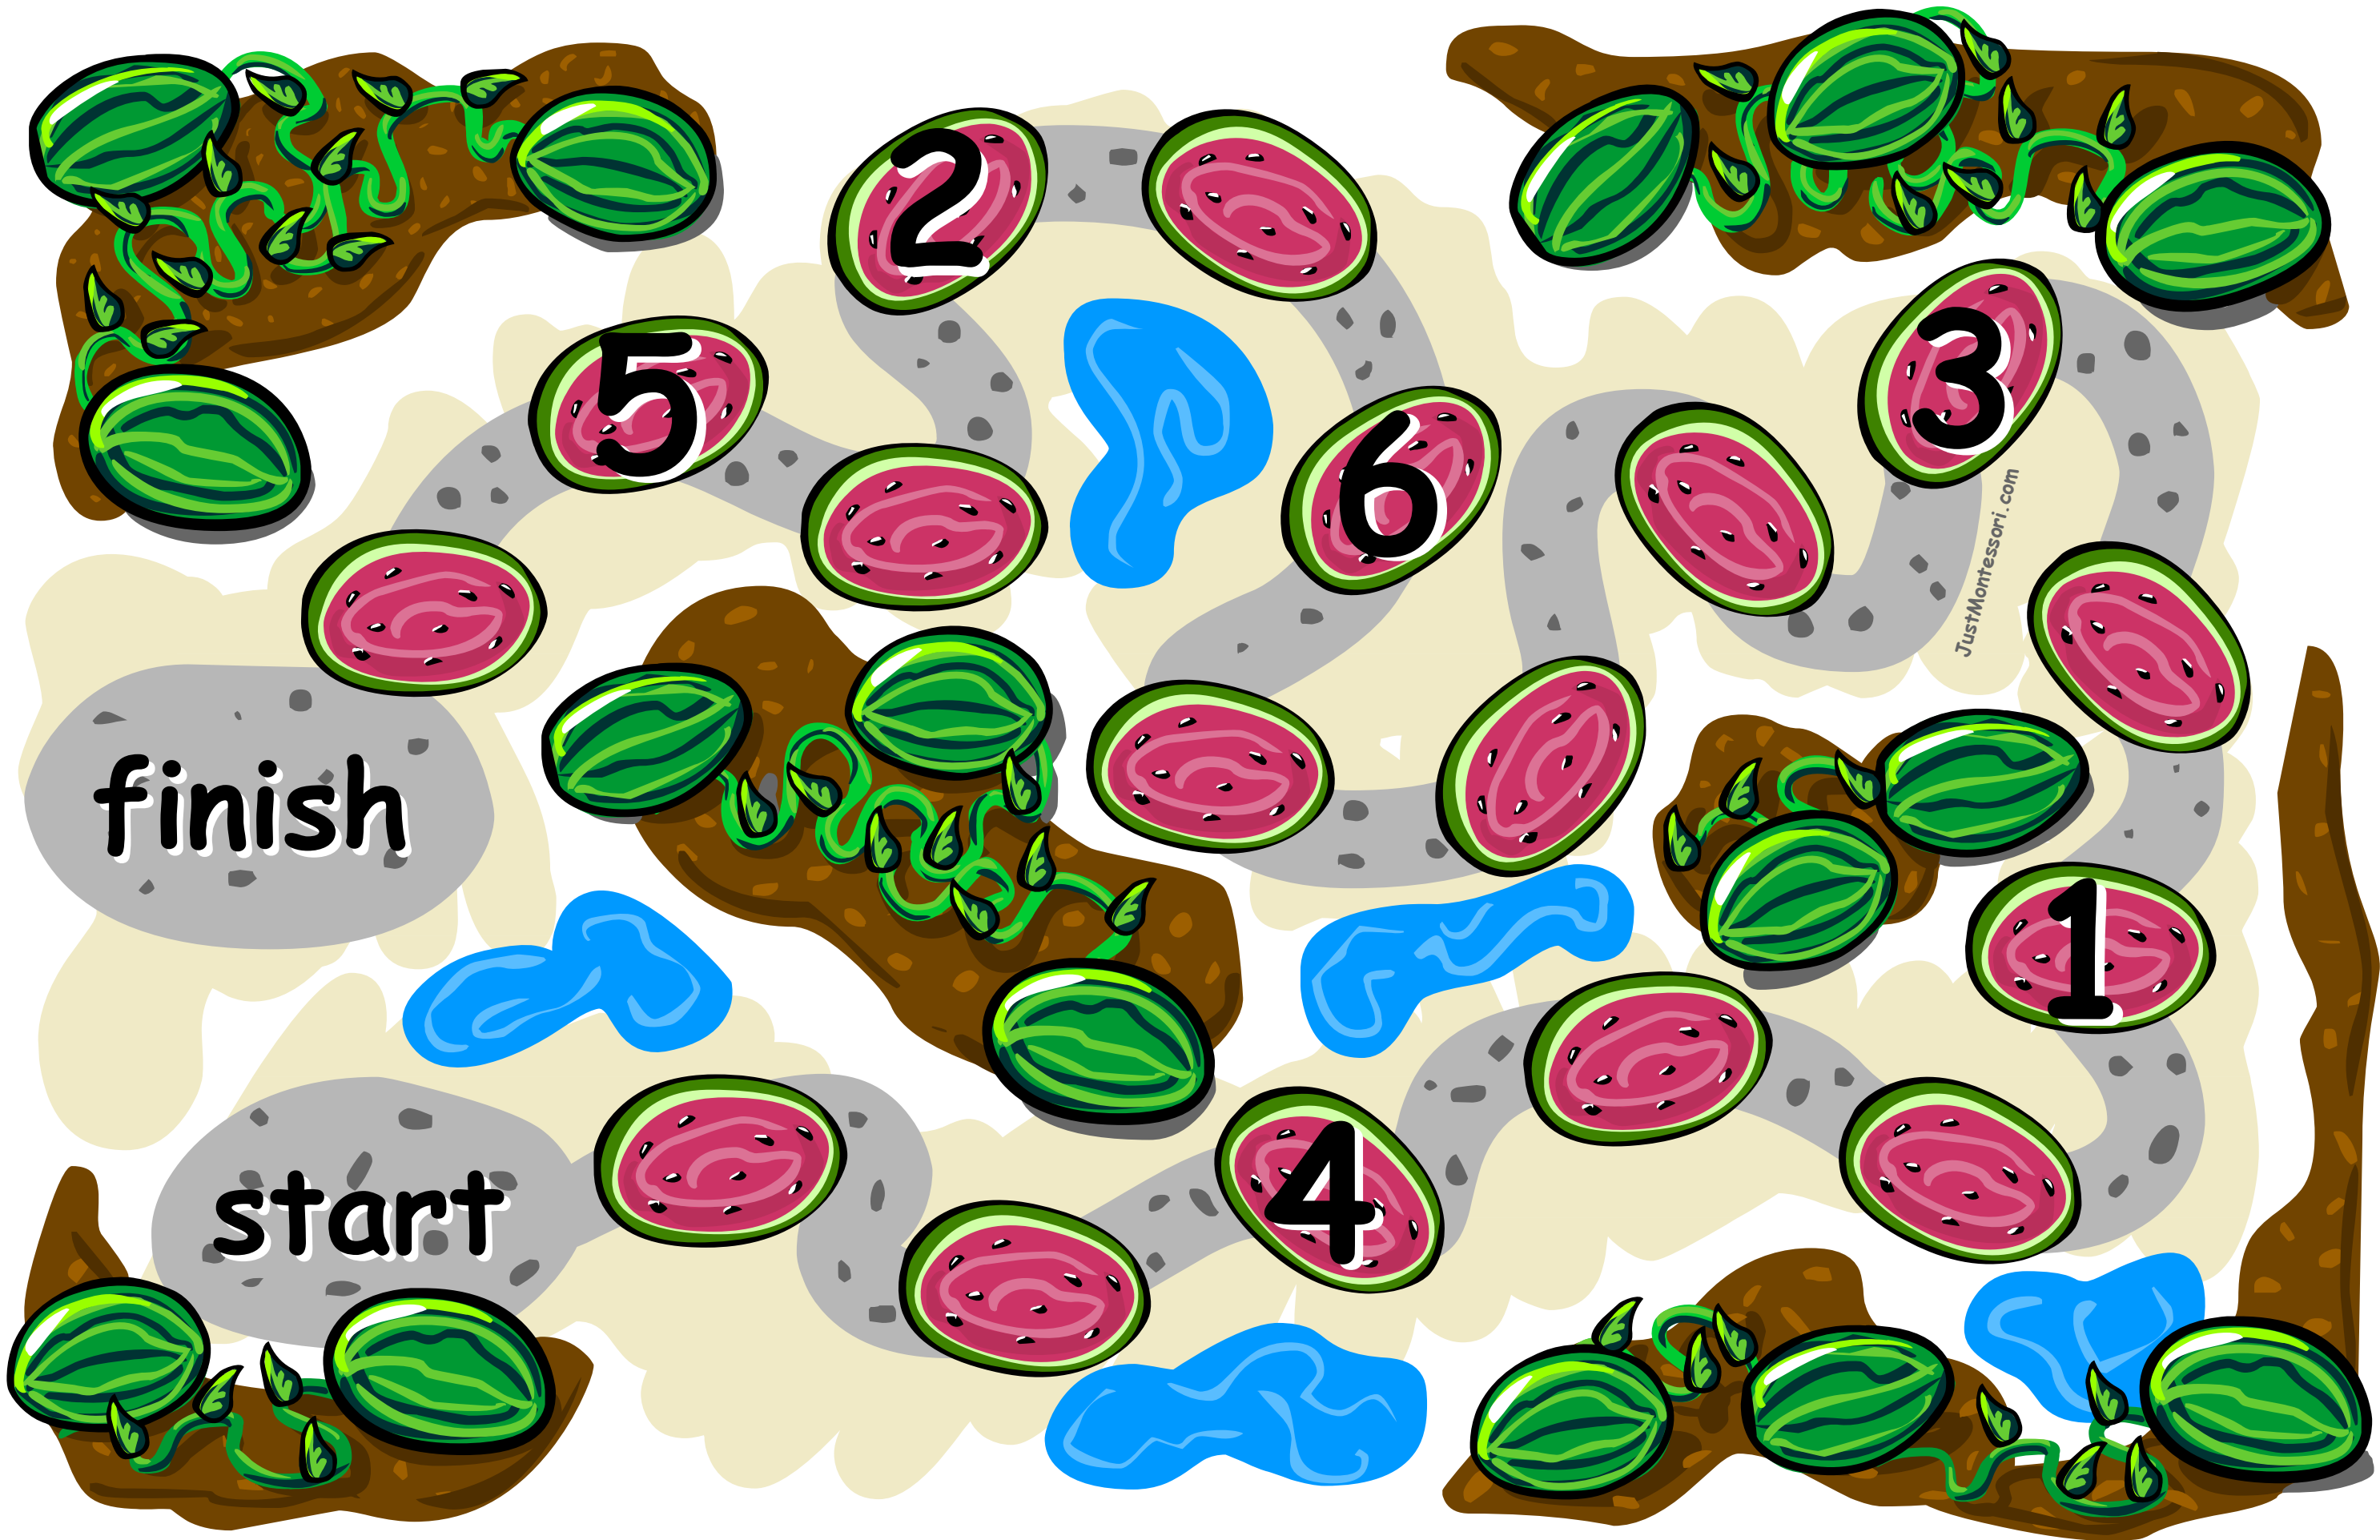

### How to play

Have each child roll one die to see how many watermelons along the path to move. If they land on a watermelon with a number on it, have them collect that number of seeds (you make the seeds out of styrofoam).

They continue to collect seeds as each child lands on a numbered watermelon. When both children have made it to the end they count up the number of seeds each has collected.

The most seeds collected wins!
